

# Paper Plate Wind Spinner

## Materials:

- Paper Plate
- Markers
- String / Twine
- Scissors

## Instructions:

1. Use markers to decorate your paper plate
2. Working from the outer edge of the paper plate, cut a swirl pattern into the plate, leaving a 2" circle in the middle. (As shown.)
3. Poke a hole in the center of the circle and thread your embroidery thread or string through it. Secure with a double knot.
4. Hang your wind spinner in front of a window or somewhere where it will catch gusts of wind.

## The Science:

As wind comes across the paper plate, the force of the wind spins the plate.
