

NO: 2024010077  
DATE: 26th March 2024  
TO: Refrigeration Customers  
FROM: Copeland, MEA  
SUBJECT: Copeland Selection Software update for Refrigeration- MEA

The new version of **Select 8.24 MEA** has been released.

A banner for Copeland Selection Software. On the left, the title 'Copeland Selection Software' is followed by a short description: 'The industry's leading selection software that gives access to functionality with a single click. Fast and user friendly, which allows users to make a quick selection or move to more advanced system calculations. Custom settings enable users to quickly recall frequently used conditions and add contact and client details.' On the right, there is a blue button with the text 'ME Select Version: 8.24.7' and 'Data Version: 9.60 / 45359' above a 'DOWNLOAD' button with a downward arrow. To the right of the button is a small image of a compass.

Select 8.24 comes with the following new features:

- Multiple refrigerant selection completely integrated in the user interface
- Automatic update option for software and database
- Modular user interface, entirely customizable
- Possibility to extract polynomials at custom conditions and for capacity control
- Possibility to hide individual envelopes to improve clarity

Version 8.24
